

Drive quality and productivity across your pathology lab

Concentriq® Dx is the digital pathology platform used by leading hospital and reference laboratories to drive quality, productivity, and insight in diagnostic pathology. CE-marked for in-vitro diagnostic use in Europe and available for primary diagnosis in the US during the COVID-19 public health emergency, Concentriq Dx accelerates image-based workflows and delivers actionable insights that empower labs as they prepare for the future of pathology.

Empowering the pathologist and the lab

INTUITIVE DIGITAL CASE REVIEW

Simplified case review in Concentriq Dx makes signing out cases faster than ever. Concentriq Dx offers an easy-to-use interface to accelerate day-to-day pathology work.

Key features:

- Deep-zoom image viewer featuring a full set of annotation and image adjustment tools
- Ability to import, organize, and view scanned slides in virtually any image format
- Designed for performance with minimal latency for a smooth viewing experience

WORKFLOWS DESIGNED FOR YOUR LAB

Avoid one-size-fits-all digital workflows with a configurable platform. Concentriq Dx is flexible and integrated with your lab's hardware and software so you can seamlessly incorporate digital pathology as the driver of routine work.

Key features:

- Platform configurability enables intuitive, pathologist-centric workflows
- Automated case creation, assignment, and ordering
- Robust bidirectional LIS integration

STREAMLINED SECOND OPINIONS AND COLLABORATION

Concentriq Dx makes sharing cases easy. With support for real-time and asynchronous collaboration and second opinions, the high-performance and secure Concentriq platform breaks down the barrier between physical location and insight from the right experts.

Key features:

- Intuitive second opinion request and fulfillment workflows for single-site and networked labs
- Access to images and data remotely, from anywhere, via a browser
- Live collaboration and synced viewing with unlimited users
- Role-based permissions and enterprise-grade security for access and sharing

“We rigorously evaluated multiple enterprise imaging platforms and chose Concentriq because it gives us full flexibility and infinite scalability with its truly open approach.”

PIETER VAN DER VORM

Deploying Concentriq Dx in your organization

ENTERPRISE-GRADE SCALABILITY

It is imperative that your digital pathology solution is able to adapt and provide the support your organization needs, now and in the future. With its scalable architecture, Concentriq Dx supports even the largest multi-site pathology networks, accommodating unlimited amounts of data, scanners, and users.

ECOSYSTEM INTEROPERABILITY

Whether it's purchasing new scanners or integrating with other components of your pathology ecosystem, only a truly open platform will be able to accommodate your future needs as you grow your digital implementation. Concentriq Dx integrates with leading scanners, lab information systems, and other systems to centralize all of your pathology images and data on a single platform.

FLEXIBLE DEPLOYMENT

Concentriq Dx can be deployed to public and private clouds, as well as on premises, offering a best-in-class solution that makes installation, maintenance, and scale-up easy and cost-effective. We offer Concentriq Dx on infrastructure provided by our partners: Amazon Web Services (AWS), Microsoft Azure, Google Cloud, and Dell EMC.

INTUITIVE AND CONFIGURABLE

No more "one-size-fits-all software." Every lab environment is different, which is why Concentriq Dx is modular and flexible. From workflows to roles and permissions and integrations, Concentriq Dx is highly configurable to support your team in how it operates.

INDUSTRY-LEADING PROFESSIONAL SERVICES AND SUPPORT

Whether you're just getting started with digital pathology or looking to scale your implementation, Proscia® is your partner in the process. Our Professional Services team helps to guarantee project success by supporting systems analysis, design, data migration, end-user training, and more.

Concentriq integrates with leading scanners, including:

PHILIPS
LEICA
3DHISTECH

HAMAMATSU
ROCHE
HURON

MIKROSCAN
MOTIC
OLYMPUS

OPTRASCAN
ZEISS

“I have worked with a number of interfaces in the past. Proscia’s platform has a sleek, intuitive interface that can handle large images smoothly.”

DR. GEORGE LEE, PH.D.
